

Home Upgrade Grant scheme 2

Over the last 5 years the HEART team have worked continuously to deliver domestic retrofitting projects set out by the Department of Energy, Security and Net Zero alongside the pilot Local Energy Demonstrator scheme to provide residents with advice and sign post to funding opportunities heres some of our achievements:

"I was offered the HUG2 grant. Originally it was discussed that I would have insulation measures for a fabric first approach but after reviewing my property they discovered it wasn't fully viable, after a chat with my case officer, I told her my oil boiler was broken she told me it may be possible to get an Air Source Heat Pump, she also paired it with solar panels which could still meet the heat demand without the insulation. My house is much warmer than it has ever been and the solar panels have greatly reduced my electric bills too. As a single working man I've never had anything like this given to me before. It's greatly improved the warmth of my house and also helped me reduce my carbon footprint and bills. Massive thanks to my case officer for all her hard work! Also all the Everwarm people did such a good job especially Liam who fit the heat pump. Many thanks!!"

-Resident from Theddlethorpe

The original EPC for this property was F21.

After installing an Air Source Heat Pump, Flat roof Insulation and Solar PV the new Energy Performance is C76.

9 Tonnes of carbon has been reduce from this property.

The saving average for this property is **£1,446.00** per year.

This property had Solar PV and an Air Source Heat Pump installed. The Energy Performance uplift went from an E50 up to a B84 and saved 3.9 tonnes of carbon as well as a household saving on fuel of £877 per year.

The whole team went above and beyond to help whenever necessary; they were all lovely to deal with from start to finish. The team and all the workmen who I dealt with were brilliant. The works are fantastic and we are enormously grateful to everyone involved.

-Resident from Chapel St Leonards

"Our case officer kept in touch through the whole process, It has been worth the wait, the Solar Panels and windows have made such a difference. I am very grateful."

-Ms Smith, Resident of Spalding

"I really appreciate having all the improvements made on the house which will make it warm in the Winter. I am so looking forward to being warmer. The whole programme is a big deal for me. Thank you very much for all of your help and my case officers support has been amazing."

-Resident from Boston
